

Kyoto University of Advanced Science School Regulations

April 1, 1969

Enacted

Chapter 1 General Provisions

Article 1 The name of this university is Kyoto University of Advanced Science (hereinafter referred to as “KUAS”). The name of the university in English is Kyoto University of Advanced Science.

Article 1-2 The aim of KUAS, based on the Basic Act on Education and the School Education Act and the founding principles of the Nagamori Gakuen Educational Foundation, shall be to nurture top-notch professionals who can identify and solve the problems of the future. Furthermore, KUAS will aim to impart a broad foundational knowledge to all of its students through comprehensive teaching and in-depth research of the arts and sciences.

Article 1-3 The educational objectives of each faculty and department at KUAS are shown in Appended Table 1.

Chapter 1-2 Self-inspection and Self-evaluation

Article 1-4 KUAS shall conduct self-inspections and self-evaluations of the status of its educational and research activities, etc., to improve educational standards and achieve the objectives outlined in Article 1-2.

2 KUAS shall establish a committee for self-inspection and self-evaluation to carry out the inspections and evaluations outlined in the preceding paragraph.

Chapter 2 Faculties, Departments, Student Capacity and Length of Study

Article 2 KUAS shall have the following faculties and departments

Faculty of Economics and Business Administration

Department of Economics

Department of Business Administration

Faculty of Humanities

Department of Psychology

Department of Japanese History and Cultural Studies

Faculty of Bioenvironmental Sciences

Department of Environmental and Bioresource Sciences

Department of Applied Biological Sciences

Department of Bioscience

Department of Bioenvironmental Design

Department of Agriculture and Food Technology

Faculty of Health and Medical Sciences

Department of Nursing

Department of Speech and Hearing Sciences and Disorders

Department of Health and Sports Sciences

Faculty of Engineering

Department of Mechanical and Electrical Engineering

(2) Graduate Schools shall be established at KUAS.

Necessary matters concerning the KUAS Graduate Schools shall be defined separately.

Article 3 The student enrollment capacity of KUAS shall be as follows.

		Admissions Quota	Transfer Student Quota	Total Enrollment Capacity
Faculty of Economics and Business Administration	Department of Economics	185	-	740
	Department of Business Administration	185	-	740
Faculty of Humanities	Department of Psychology	80	-	320
	Department of Japanese History and Cultural Studies	90	-	360
Faculty of Bioenvironmental Sciences	Department of Environmental and Bioresource	80	-	320
	Department of Applied Biological Sciences	80	-	320
	Department of Bioscience	No longer		

			accepting students		
	Department of Bioenvironmental Design	No longer accepting students			
	Department of Agriculture and Food Technology	No longer accepting students			
Faculty of Health and Medical Sciences	Department of Nursing	80	-		320
	Department of Speech and Hearing Sciences and Disorders	30	-		120
	Department of Health and Sports Sciences	90	-		360
Faculty of Engineering	Department of Mechanical and Electrical Engineering	200	-		800

Article 4 The term of study shall be 4 years. However, the enrollment period for undergraduate students cannot exceed 8 years.

- 2 Notwithstanding the provision of the preceding paragraph, it may be sufficient for those who have earned the prescribed credits stipulated in Article 15 with excellent grades to be enrolled for three years or more.
- 3 In the case where a person who has earned a certain number of credits at KUAS as a non-student is admitted to KUAS, if the President of KUAS recognizes that the person has completed a part of the educational program at KUAS by earning such credits, the President of KUAS shall determine the period during which the person is recognized as having completed the educational program, taking into consideration the number of credits earned and other matters, and the total credits earned shall be added to the period of study stipulated in paragraph 1. The period of study may be counted toward the period of study stipulated in Paragraph 1.

Chapter 3 Academic Year, Semester Dates, and Holidays

Article 5 The academic year begins on April 1 and ends on March 31 of the following year.

Article 6 The academic year shall be divided into the following two semesters.

- (1) Spring Semester (from April 1 to September 15)

(2) Fall Semester (from September 16 to March 31 of the following year)

Article 7 Holidays shall be as follows.

(1) Saturdays and Sundays

(2) Days stipulated as holidays by the “Act on National Holidays”

(3) Deleted

(4) Deleted

(5) Summer Vacation: As prescribed separately in the KUAS academic calendar

(6) Winter Vacation: As prescribed separately in the KUAS academic calendar

(7) Spring Vacation: As prescribed separately in the KUAS academic calendar

2 Other days deemed necessary by the President may be designated as special holidays.

3 Classes may be held on holidays when the President deems it necessary.

Chapter 4 Courses and Course Registration

Article 8 Courses, credits, and how to register for courses at KUAS shall be as shown in Appended Table 1-2.

2 Those who have earned the prescribed credits with excellent grades may be allowed to register for courses regardless of the course registration limit specified in Appendix Table 1-2.

Article 8-2 The qualifications that can be acquired at KUAS are as follows.

(1) Teacher’s license

Faculty of Humanities

Department of Psychology

Type of License	Subject
Type 1 senior high school teacher's license	Civics

Department of Japanese History and Cultural Studies

Type of License	Subject
Type 1 Junior high school teacher's license	Social Studies
Type 1 Senior high school teacher's license	Geography & History
Type 1 Senior high school teacher's license	Civics

Faculty of Bioenvironmental Sciences

Department of Environmental and Bioresource Sciences

Type of License	Subject
Type 1 Junior high school teacher's license	Science
Type 1 Senior high school teacher's license	Science
Type 1 Senior high school teacher's license	Agriculture

Department of Applied Biological Sciences

Type of License	Subject
Type 1 Junior high school teacher's license	Science
Type 1 Senior high school teacher's license	Science

Department of Bioscience

Type of License	Subject
Type 1 Junior high school teacher's license	Science
Type 1 Senior high school teacher's license	Science

Department of Bioenvironmental Design

Type of License	Subject
Type 1 Junior high school teacher's license	Science
Type 1 Senior high school teacher's license	Science

Department of Agriculture and Food Technology

Type of License	Subject
Type 1 Senior high school teacher's license	Agriculture

Faculty of Health and Medical Sciences

Department of Health and Sports Sciences

Type of License	Subject
Type 1 Junior high school teacher's license	Health and Physical Education
Type 1 Senior high school teacher's license	Health and Physical Education

(2) Museum Curator

(3) Deleted

(4) Deleted

Article 8-3 Deleted

Article 8-4 Deleted

Article 8-5 Establish a food hygiene course in the Faculty of Bio-Environmental Science at KUAS.

Article 9 Classes at KUAS shall be conducted through lectures, seminars, experiments, practical training, or skills practice, or a combination of these.

2 As separately determined by the Minister of Education, Culture, Sports, Science and Technology, the lessons referred to in the preceding paragraph may be taken at places other than classrooms, etc., where such lessons are taught, by making advanced use of a variety of media.

3 The classes mentioned in paragraph (1) above may be taken in a foreign country. The same shall apply to the case of having students take classes in places other than classrooms where said classes are provided by making innovative use of various media as prescribed in the preceding paragraph.

Article 10 The number of credits will be calculated based on the number of classes per unit, which will be approximately 15 to 45 hours as determined by the university.

2 The number of credits for graduation theses, graduation research, graduation projects, and similar courses shall be determined in consideration of the study required for these courses.

Article 10-2 In principle, classes, including examinations, shall be held for 35 weeks per year.

Article 11 The distribution of courses throughout the year shall be provided separately.

Article 12 Students must notify KUAS of the courses they intend to take by the prescribed date.

Chapter 5 Granting of Credits, Graduation Accreditation, and Degree Certificates

Article 13 Students who have taken courses shall be evaluated on the basis of the results of their studies and awarded credits through examinations and other appropriate methods determined by the university.

2 The regulations concerning examinations shall be provided separately.

3 The maximum grade for a course shall be 100 points, and a grade of 60 points or

fewer shall be a failing grade. For students admitted during the 2018 academic year or earlier, grading shall be as follows.

優 ≡ (A) 80 points or higher] Passing grade
良 ≡ (B) 70 to 79 points	
可 ≡ (C) 60 to 69 points	
否 ≡ (F) 59 points or lower	Failing grade

4 With respect to the grades in paragraph 3, the following provisions shall apply to students admitted in the 2019 academic year or later.

S 90 points or higher] Passing grade
A 80 to 89 points	
B 70 to 79 points	
C 60 to 69 points	
F 59 points or lower	Failing grade

Article 14 KUAS may allow students to take courses at other universities or junior colleges that it deems appropriate, if it is deemed educationally beneficial.

2 The credits acquired in accordance with the preceding paragraph may be approved as graduation requirements up to 60 credits after the approval of the Faculty Council.

Article 14-2 When deemed educationally beneficial, studies completed by students at junior colleges or colleges of technology that are deemed appropriate by KUAS, and other studies as specified separately by the Minister of Education, Culture, Sports, Science and Technology, may be regarded as coursework at KUAS and credited toward graduation requirements after approval by the Faculty Council.

(2) The number of credits that can be granted in accordance with Paragraph 1 shall not exceed 60 credits, including the number of credits deemed to have been acquired at KUAS in accordance with Paragraph 2 of the preceding article.

Article 14-3 When deemed educationally beneficial, credits earned from courses taken at universities or junior colleges prior to enrollment in KUAS may, with the approval of the Faculty Council, be deemed to have been earned through coursework taken

after enrollment in KUAS.

2 When deemed educationally beneficial, the study stipulated in Paragraph 1 of the preceding article, conducted prior to the student's enrollment at KUAS, may be regarded as completion of coursework at KUAS, and credits may be granted after discussion by the Faculty Council.

3 The number of credits that may be deemed to have been acquired or granted in accordance with the preceding two paragraphs shall not exceed 60 credits in total for credits other than those acquired at KUAS, except in the case of transfer students, etc.

Article 15 In addition to earning the prescribed credits, a diploma shall be awarded as determined by the university.

2 Graduates of KUAS shall be conferred a bachelor's degree and shall be assigned the name of the following major field of study according to the major in which they studied.

Faculty of Economics and Business Administration	Department of Economics	Economics
	Department of Business Administration	Business Administration
Faculty of Humanities	Department of Psychology	Humanities
	Department of Japanese History and Cultural Studies	Humanities
Faculty of Bioenvironmental Sciences	Department of Environmental and Bioresource Sciences	Bioenvironmental Sciences
	Department of Applied Biological Sciences	Bioenvironmental Sciences
	Department of Bioscience and Biotechnology	Bioenvironmental Sciences
	Department of Bioenvironmental Design	Bioenvironmental Sciences
	Department of Agriculture and Food Technology	Bioenvironmental Sciences

Faculty of Health and Medical Sciences	Department of Nursing	Nursing
	Department of Speech and Hearing Sciences and Disorders	Speech and Hearing Sciences and Disorders
	Department of Health and Sports Sciences	Health and Sports Sciences
Faculty of Engineering	Department of Mechanical and Electrical Engineering	Engineering

Chapter 6 Admission, Withdrawal, Leave of Absence, Study Abroad, Transfer,
Transfer Faculty, Transfer Department, and Transfer of Institution

Article 16 Enrollment period shall be at the beginning of each semester.

Article 17 Those who are eligible for admission to KUAS shall be those who meet one of the following conditions

- (1) Those who have graduated from high school
- (2) Those who have completed 12 years of school education through a regular course (including those who have completed school education through a course other than a regular course that is equivalent thereto).
- (3) Those who have completed 12 years of school education in a foreign country or those who have been designated by the Minister of Education, Culture, Sports, Science and Technology as equivalent thereto.
- (4) Those who have completed a course at an overseas educational institution that has been accredited by the Minister of Education, Culture, Sports, Science and Technology as having a course equivalent to that of a high school course.
- (5) Those who have been designated by the Minister of Education, Culture, Sports, Science and Technology
- (6) Those who have passed the University Entrance Qualification Examination administered by the Minister of Education, Culture, Sports, Science and Technology in accordance with the University Entrance Qualification Examination Regulations.
- (7) Those who have reached an appropriate age and be recognized by KUAS as having academic ability equivalent to or greater than that of a high school graduate.

Article 18 Applicants applying for admission to KUAS must follow the prescribed

procedures.

- 2 The procedures for admission shall be prescribed separately.

Article 19 Students seeking permission to take a leave of absence or withdraw from KUAS due to illness or other reasons must submit a request jointly signed by their guarantor.

- 2 The period of leave of absence may not exceed two consecutive years. However, in case of special reasons, it may be extended for up to one year.

- 3 Time spent on a leave of absence shall not be counted towards the number of years of enrollment as prescribed in Article 4.

- 4 The total period of a leave of absence shall not exceed four years.

- 5 When a student taking a leave of absence intends to re-enroll, they must submit a re-enrollment application and obtain permission.

Article 19-2 Students who have been approved by KUAS to study abroad shall be regarded as “studying abroad”, and shall not be treated as students “taking a leave of absence”.

- 2 Study abroad shall be included in the years of study as stipulated in Article 4.

Article 20 If a student who has left the school at his/her request requests to be readmitted within two years, he/she may be permitted to do so.

Article 21 When a student who falls under one of the following categories applies for transfer admission, he/she may be admitted to the appropriate year after selection only when there is a vacancy.

- (1) Those who have graduated from or withdrawn from a university.

- (2) Those who graduated from or withdrew from a junior college or college of technology.

- (3) Those who have completed a special training school

- 2 No student may apply for admission or transfer to another university without permission from the president.

- 3 When a KUAS student requests a transfer, the student may be allowed to transfer to the appropriate year after selection only if there is a vacancy in the department to which the student is transferring.

- 4 When a KUAS student requests a transfer, the student may be permitted to transfer

to the appropriate year after selection only if there is a vacancy at the transfer institution.

(Deleted)

Chapter 7 School Fees

Article 22 Those who apply for admission to KUAS must pay the entrance examination fee.

2 The amount of the entrance examination fee shall be determined separately.

Article 23 Those who are admitted to KUAS must pay the admission fee.

Article 24 Students must pay tuition, facility and equipment fees, laboratory fees, and other school fees as stipulated.

Article 25 Non-degree students must pay the registration fee and course fee, undergraduate course auditors must pay the auditing fee, sponsored students must pay the education fee, and research students must pay the registration fee and research fee.

2 Non-degree students from high schools affiliated with KUAS who take courses as Non-degree students are exempted from the registration and course fees stipulated in the preceding paragraph.

Article 26 The amount of the admission fee, tuition and other school fees shall be as shown in Appendix 2.

Article 26-2 The collection of school fees shall be determined separately.

Article 27 Once accepted, school fees are not refundable for any reason.

Article 27-2 Students will be exempt from the payment of school fees for the duration of their leave of absence. During the period of absence, the enrollment fee must be paid each spring and fall semester. In addition, students who have paid school fees during the said period shall be exempted from paying the enrollment fee.

Article 28 Those who fail to pay tuition and other school fees shall be dismissed.

2 When a student who has been dismissed under the preceding paragraph requests reinstatement, permission may be granted after screening.

Chapter 8 Staff organization and faculty meetings, etc.

Article 29 KUAS shall have educational, administrative and other staff members.

Article 30 Educational staff shall be professors, associate professors, junior associate

professors, assistant professors, and research assistants.

Article 31 KUAS shall have a President and Deans.

2 KUAS may have a vice president.

3 Each faculty may have a vice dean.

4 Each department may have a department head.

5 The president shall oversee academic affairs and supervise the staff of the university.

6 The Vice President shall assist the President and oversee academic affairs as ordered.

7 Deans shall oversee the academic affairs related to the faculty concerned.

8 The Vice Dean shall assist the Dean in his/her duties.

9 The Department Head organizes and coordinates the academic affairs of the department concerned under the order of the dean.

Article 32 KUAS shall establish the University Council as an organization to assist the President by deliberating important matters concerning the organization, administration, and education and research activities of KUAS, expressing opinions to the President, and making decisions.

2 The University Council shall consist of the President, Vice Presidents, Deans of each department and graduate school, the University Bureau Chief Director and the Vice Chief Director of the University Bureau.

3 When the President deems it necessary, he/she may request the attendance of persons other than those mentioned in the preceding paragraph to hear their opinions or to have them make reports or explanations.

Article 32-2 The authority and operation of the University Council shall be determined separately.

Article 33 The faculties of KUAS shall have a Faculty Council as an organization that extends its opinions when the President makes decisions on important matters concerning education and research, deliberates on matters concerning education and research under the control of the President and Deans, and may express its opinions at the request of the President and Deans.

2 The Faculty Council shall consist of the deans, vice deans, department heads, and other professors.

3 Associate professors and other staff members may be added when deemed necessary by the Dean.

Article 34 Matters concerning the role and operation of the Faculty Council shall be prescribed separately.

Article 34-2 KUAS shall establish a department meeting as an organization that reports and communicates the deliberations, consultations, and decisions made at the regular, extraordinary, performance review, and other faculty meetings of the department, and coordinates and facilitates the smooth operation of the department concerned.

2 The department meeting shall consist of professors, associate professors, lecturers, assistant professors, and assistant professors in addition to the department chairperson.

Chapter 9 Non-degree students, Auditing students, Sponsored students, Research students

Article 34-3 Those who apply to take courses may be approved as Non-degree students after selection.

2 When there is a student from another university who wishes to take courses at KUAS, KUAS may permit the student to enroll as Non-degree students from the other university based on discussions with the other university.

3 Non-degree students from high schools or colleges of technology who wish to take classes at KUAS may be accepted as non-degree students after screening.

4 Non-degree students may receive credit.

Article 35 Students who have requested to audit a specific class may be permitted to do so after screening.

2 Deleted

3 Auditing students shall not receive academic credits.

Article 36 Deleted

Article 37 If a public organization or other institution sponsors a student to study a particular course at KUAS, the student may be accepted as a sponsored student after screening.

2 No credit will be given to sponsored students.

Article 37-2 Students who have applied to study a specific subject at KUAS may be accepted as research students upon selection.

2 Research students shall not receive academic credits.

Article 38 Deleted

Article 39 Non-degree students, auditing students, sponsored students, and research students must abide by the university regulations and other rules. However, the provisions of Articles 4 and 15 shall not apply mutatis mutandis.

Chapter 10 Awards and Punishments

Article 40 Awards may be given to students who excel in both conduct and academics and who set a good example for others.

Article 41 If a student violates the University regulations or other rules, or commits any other act contrary to the student's true nature, the President shall discipline the student after hearing the opinions of the Faculty Council.

2 Disciplinary actions shall include admonishment, suspension, and expulsion.

3 Matters concerning disciplinary actions shall be set forth in the “Regulations Concerning Student Discipline”

Article 42 If Non-degree students, auditing students, sponsored students, or research students violate the University regulations or other rules, the President may, after hearing the opinions of the Faculty Council, revoke their permission.

Chapter 11 Library

Article 43 A library shall be established in KUAS.

2 Regulations concerning the library shall be prescribed separately.

Chapter 12 Psychoeducational Counseling Office

Article 44 KUAS shall establish a Psychoeducational Counseling Office.

2 Regulations concerning the Psychoeducational Counseling Office shall be prescribed separately.

Chapter 13 Student Dormitories

Article 45 KUAS shall establish student dormitories.

2 Regulations concerning student dormitories shall be determined separately.

Chapter 14 Extension Lectures

Article 46 KUAS may offer public lectures from time to time.

Chapter 15 Supplementary Rules

Article 47 In addition to the provisions of these school regulations, matters necessary for the enforcement of the school regulations shall be determined separately.

Article 48 In amending or repealing these regulations, the President shall hear the opinions of the councils for each faculty and the university council.

Supplementary Provisions

Appended Table 1 (Related to Article 1-3)

Educational Objectives of Each Faculty and Department

Faculty/Department	Educational Objectives of Faculties and Departments
Faculty of Economics and Business Administration	Through an educational curriculum that emphasizes practical learning, with a focus on economics and business administration, as well as courses in law, the program aims to nurture individuals with both the broad education and the high level of expertise that are necessary for businesspersons.
Department of Economics	The program focuses on economics, but also includes courses in business administration and law. The educational objective is to develop professionals who can play an active role in society with the broad education necessary for businesspersons and the broad perspective acquired through systematic study of economics.
Department of Business Administration	The program focuses on business administration, but also includes courses in economics and law, with the aim of developing professionals who can stand on their own feet as members of society through a wide range of education and hands-on experience-oriented learning necessary for businesspersons.
Faculty of Humanities	The objective is to develop young professionals for the new era by acquiring knowledge in various fields of the humanities, with a focus on psychology and history.
Department of Psychology	The objective is to develop professionals who have acquired sufficient basic knowledge and skills in psychology and related fields, and who have the ability to flexibly apply and solve problems in business and psychology settings.

Department of Japanese History and Cultural Studies	The objective is to develop professionals who have acquired sufficient basic knowledge and research skills in history and related fields, and who are able to use them to solve problems in the real world.
Faculty of Bioenvironmental Sciences	In order to provide essential solutions to environmental problems and resource/energy issues, the program will cultivate professionals capable of realizing "an environment where diverse living creatures can coexist together with people (called bio-environment)" through international collaboration and cooperation with local communities, utilizing the results of advanced research and technologies in the field of bioscience.
Department of Environmental and Bioresource Sciences	The department cultivates "bio-environmental science engineers and researchers" with a broad perspective and the ability to make judgments based on knowledge and technology in bio-environmental science to scientifically address the challenges facing humanity and the Earth. Specifically, by teaching a wide range of ecological knowledge, environmental analysis techniques, environmental restoration, and cultivation and breeding techniques for agricultural products through lectures, experiments, and field practice, the program trains environmental specialists, agricultural engineers, and researchers who can contribute to the symbiosis between people and nature.
Department of Applied Biological Sciences	The department trains "green biotechnologists and researchers" with a broad perspective and judgment to scientifically address issues facing humanity and the Earth based on knowledge and technologies of applied life sciences. Specifically, the program aims to foster engineers and researchers who can contribute to the environment and human health by teaching a wide range of knowledge and skills in a broad range of applied life science fields, from the molecular, genetic, and cellular levels of microbes, insects, plants, and animals to food processing, fermentation, brewing, and food functionality and safety, through lectures, exercises, and experiments.
Department of Bioscience and Biotechnology	The educational objective is to acquire green biotechnology in harmony with the environment. Students will learn a wide range of biotechnology knowledge and techniques in the areas of animals, plants, insects, microorganisms, foods, and genes through lectures and experiments, aiming to become biotechnicians who can contribute to the environment and human health.
Department of	The educational objective is to cultivate environmental

Bioenvironmental Design	design skills based on science and technology related to material circulation and dynamics in symbiotic spaces such as agricultural and forest environments, water environments, and urban environments, and their landscapes. Students will learn ecological knowledge, environmental analysis techniques, and environmental restoration techniques through lectures, experiments, and field practice, aiming to become environmental specialists and landscape designers who can contribute to the symbiosis between people and nature.
Department of Agriculture and Food Technology	The educational objective is to produce agricultural products that are environmentally friendly and take advantage of local characteristics, and to learn safe food processing techniques. Students will learn about the cultivation and breeding of agricultural products, food processing, fermentation and brewing, and the nutritional value and safety of foods through lectures and practical training, along with knowledge of biotechnology, to become food and agriculture experts who can contribute to the revitalization of the community.
Faculty of Health and Medical Sciences	The objective of the program is to develop professionals who can provide specialized support to people with diverse health conditions, developmental stages, and living environments, and contribute to the realization of a healthy life and the extension of healthy life expectancy.
Department of Nursing	The program aims to train nursing professionals who can think and act independently to restore and promote the health of individuals and groups, equipped with the knowledge and skills necessary to understand and respect people comprehensively and to practice nursing appropriate to their needs, as well as a rich sense of humanity and the ability to continue to learn independently.
Department of Speech and Hearing Sciences and Disorders	The program aims to train speech-language pathologists who can acquire basic evaluation, training and guidance skills in the fields of speech, hearing, and feeding and swallowing, as well as knowledge in fundamental (science) and broad fields (liberal arts), understand the condition of subjects, and proactively solve problems related to rehabilitation in cooperation with doctors and other professionals.
Department of Health and Sports Sciences	Through interdisciplinary advanced education and research that integrates a wide range of fields such as health and sports sciences, the program aims to nurture professionals who will acquire knowledge of

		healthcare and practical skills related to physical exercise and sports, and who will contribute to the realization of people's well-being in sports education, healthcare, welfare, and the sports and health industry.
Faculty of Engineering	Department of Mechanical and Electrical Engineering	The objective of the program is to develop professionals who can grasp the essence of things, acquire the ability to think logically, identify problems based on social needs from a global perspective, and solve them appropriately by making comprehensive use of their specialized skills after acquiring basic knowledge in specialized fields that span mechanical and electrical fields.
